

Magnetic voltage probe 7 mm

111.7008

- ▶ Magnetic adapter for electrical connection to screw heads.

1. Use

This magnetic adapter is used for a fast and easy electrical connection to screw heads. Voltages can be tapped from circuit breakers and power switches with PQ-Box.

2. Structure

The probes magnetic head consists of a strong magnet which is set between two iron poles. Subsequently the holding force is extra strong. The probes top has a convex surface shape to ensure a good electrical connection at curved screw heads.

3. Dimensions

Practical application example

4. Technical Data

Voltage:	1000V
Peak diameter:	7mm
Socket:	4mm
Protection class:	1000V, CAT III, 2A

We take care of it.
